

QuietAudit®

Underwriting Loss Control

Due Diligence

Automated Platform for Cyber Loss Control

Because the cost of covering a cyber event can be exorbitant, underwriters are looking for loss control programs that are focused on mitigating cyber risk for themselves and their clients and maintaining a predictable Loss Ratio.

NetDiligence® just made it easier for insurers to start and sustain a cyber-focused loss control program.

QuietAudit® Underwriting Loss Control (ULC) is a due-diligence platform that allows insurers to easily collect the data security and privacy practices of their client/policyholder, score those practices against industry standards, and produce a "scorecard" that details the client's cybersecurity strengths and weaknesses. With QuietAudit ULC, you simply invite applicants for cyber coverage to "self-attest" to their data security and privacy controls.

Loss control is a risk management technique that seeks to reduce the possibility that a loss will occur and reduce the severity of those that do occur. A loss control program should help policyholders reduce claims and insurance companies reduce losses.

TEXAS DEPARTMENT OF INSURANCE

This simple, automated process enables you to:

- Put clients on notice that they are expected to have reasonable security in place for the sensitive data they hold.
- Educate clients, giving them insight into where their safeguard practices fall short of industry standards.
- Facilitate dialog between insurer and client, building a stronger bond and positioning you as the client's "risk management partner".
- Promote ongoing attention to cybersecurity, as clients know they will need to complete the assessment again when the policy comes up for renewal.

NetDiligence®

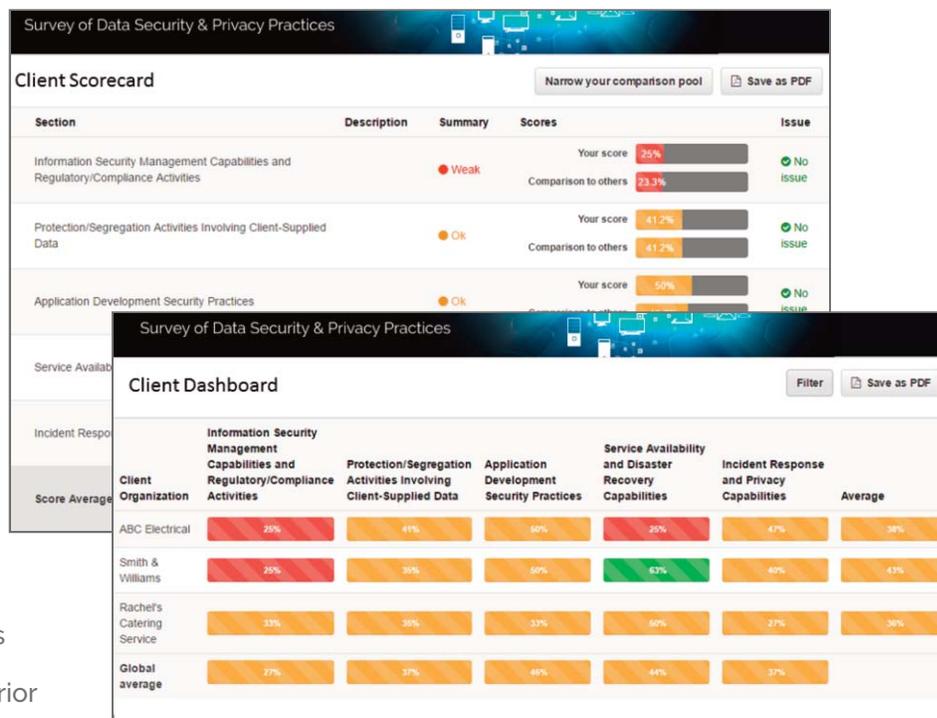

LOSS CONTROL

Monitor, assess & benchmark policyholders to industry security standards!

Key Features of QuietAudit® ULC

- Mobile-friendly Secure Application
- Simple Online Dashboard to Manage Your Program
- Optional Branding and Customization
- Custom or Standard Surveys, including:
 - Cyber Risk (spirit of ISO)
 - HIPAA Security Rule
 - NIST
 - California 20 Mandatory Controls
 - Top 10 CVEs (Common Vulnerability Exposures)
- Optional Automated Scoring
- Interactive Dialog with Clients, including Comments and Notes
- Cloning allows you to reissue prior year's survey to expedite renewals
- Client Scorecards, Client Dashboard & Enterprise Report

It's a Win-Win

QuietAudit ULC can help you start a proactive cyber loss control program—or streamline an existing one. Our platform makes it easy for you to communicate with applicants and clients, score their data security and privacy practices and manage your program from a simple online dashboard. Faster, simpler and more productive loss control—for both you and your clients!
